1. Introduction & data protection - privacy statement

The present deliverable concerns the first bundle of beneficiaries and projects that accepted to receive information about the widerAdvance Facility from the project's partners. This list is the result of the initial mapping exercise under Task 2.1 which mapped all Widening organisations taking part either as Coordinators and/or as participants across the projects they appeared to be participating following official public EU sources, notably the EU Dashboard and secondarily, CORDIS. The Widening actions mapped were funded under Horizon 2020 and Horizon Europe.

Task 2.1 is a continuous one and mapping will be updated as new beneficiaries arise from recurrent Widening calls as well as from new calls in the WP2025 and WP2026-2027. In the course of the project's duration, more beneficiaries will be contacted in order to be informed about the widerAdvance Facility. Nevertheless, new beneficiaries and projects coming up from calls of the WP 2025, such as the Widening Pre-Accelerator and the European Excellence Hubs, just to name a few, will be able to apply at more advanced cut-offs due to the time needed to generate an applicable results for the widerAdvance Facility.

Data protection and privacy

This deliverable reports only institutional and project-level information obtained from publicly accessible EU sources (including CORDIS and the EU Dashboard) and/or information provided by organisations in their official capacity. It does not include personal data within the meaning of Article 4(1) GDPR. No processing of personal data has been performed for the purposes of this deliverable, and no profiling or automated decision-making (Article 22 GDPR) is involved.

2. Executive summary

RUIZIA, as a major task contributor and FORTH as WP Leader, worked mainly through the Dashboard through the “Self-service BI” which allows customization. In case where it was needed to verify project eligibility, information was retrieved from EU CORDIS.

Following consultation at consortium level, beneficiary organisations involved in projects stemming from the below calls were extracted from the Dashboard:

- Teaming for Excellence (stage 2)
- Twinning (bottom-up, Green Deal, Western Balkans, H2020)
- ERA Chairs (H2020+Horizon Europe)
- Widening/ERA Fellowships (H2020 – Horizon Europe)
- Excellence Hubs
- European Excellence Initiative
- ERA Talents
- Hop-on
- Pathways to Synergies

The beneficiaries of the above-mentioned calls were split per unique beneficiary per country with complete project details, in order to be handed to the project partners to begin selecting the most promising candidates to disseminate information about the widerAdvance Facility. Therefore, 38 unique organizations representing 100 projects (94 unique) were provided individual sessions about the WiderAdvance Facility.

In the near future, new beneficiary organisations may benefit from the widerAdvance Facility’s services, resulting from the calls of WP2025 such as the European Excellence Initiative, EIC Pre-Accelerator, Hop-on facility, Support to R&I Policy making in EU enlargement countries, Implemented co-funded action plans for connected regional innovation valleys in Widening Countries.

3. Mapping of relevant Widening calls

Following internal discussions from the start of the project, the beneficiaries and projects of the following calls were mapped:

The table above resulted to more than 900 unique organisations. These organisations are, by average, beneficiaries to multiple projects, either as participant or coordinator, and a subset of these organisations will positively self-assess of having generated **Key Exploitable Results**.

4. How we worked

The partners consulted the individual excel sheet with project details per widening beneficiary for their countries of responsibility according to the distribution table (see Annex) .

Prioritization was a learning experience for all partners involved. At the time of individual sessions, no prior knowledge was available about the potential reception of the Facility.

As a first step, partners need to establish the need or not to prioritise projects or beneficiaries according to:

- No of projects per beneficiary
- Mix of projects per beneficiary (new, ongoing, ending, closed)
- Whether to focus on a project level or beneficiary

As a second step, possible ways of reaching out were examined, in terms of:

- Organize small scale outreach events to attract interested beneficiaries
- Invite to individual sessions beneficiaries that were acquainted to the Facility's partners
- Invite the grant/innovation support offices within beneficiary institutions

As regards to the first step, smaller countries, such as Georgia and Armenia, did not need to prioritise due to the limited number of beneficiaries.

In cases of large volume of beneficiaries, initially the partners focused on the beneficiaries with many projects. However, it was later concluded that in case with large organisations with many projects, it was more difficult to attract their interest and convince them to submit an application in a more coordinated way.

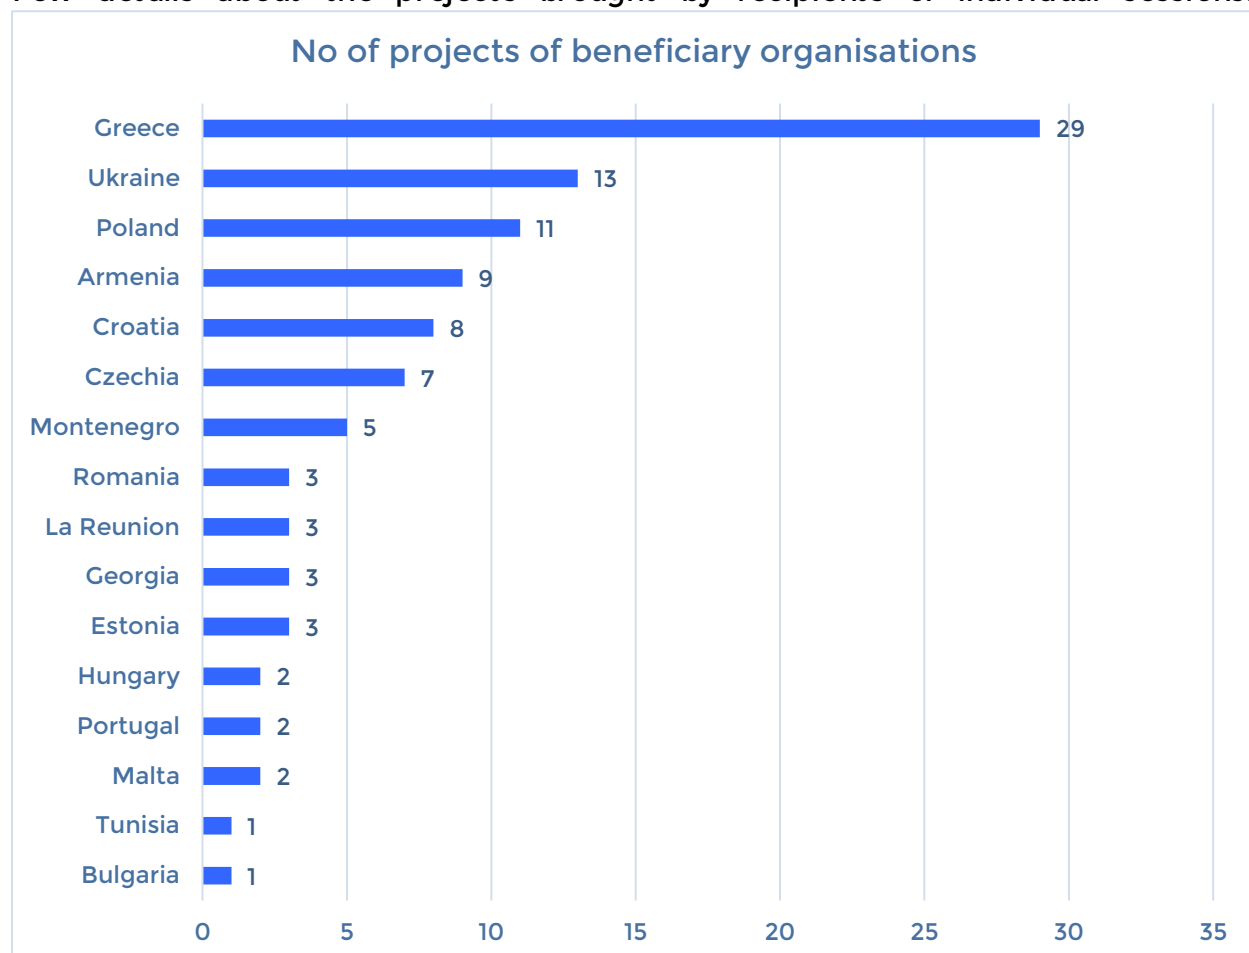

Unfortunately, not all partners managed to recruit widening beneficiaries for individual sessions, due to resistance received by the beneficiaries contacted.

5. Beneficiaries and projects of individual sessions

Individual sessions were conducted with a small subset of the huge number of organisations implementing Widening actions primarily as coordinators and located in eligible countries of the Widening programme.

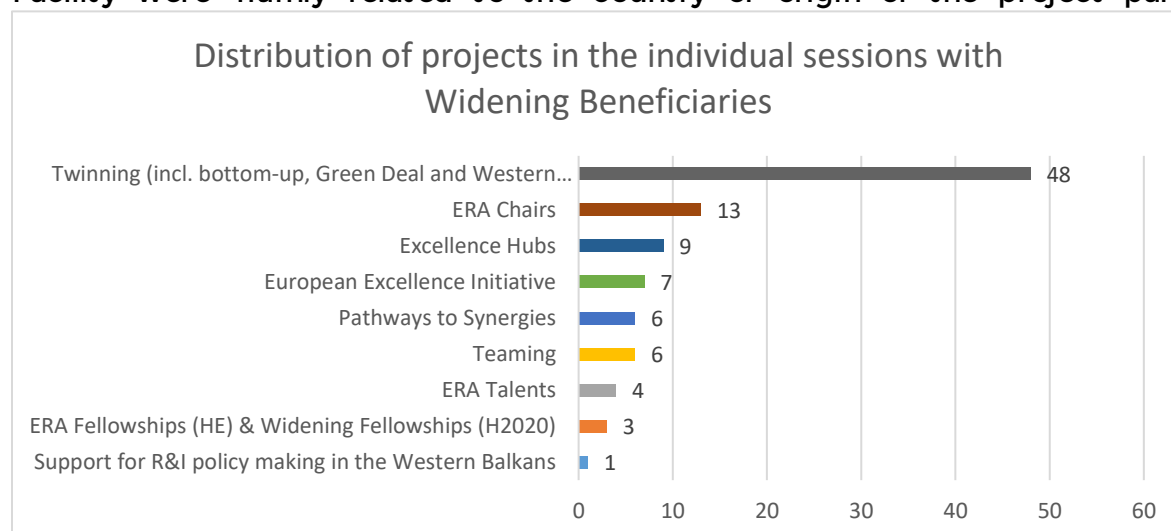

The outcome was 38 unique organisations representing 102 projects (95 unique) because in few cases several organisations that received information about the Facility participated in the same project. Furthermore, the projects were at diverse timing of their duration. Therefore, they were empirically categorized, apart from “Closed” and “New”, as “Ending” (when they have less than 6 months duration), as “Running” when they hadn’t reached their half duration and as “Mature” when they had up to 18 remaining months. The benchmark for this categorization was the date of the 1st cut-off, namely the 31st of July 2025.

Few details about the projects brought by recipients of individual sessions:

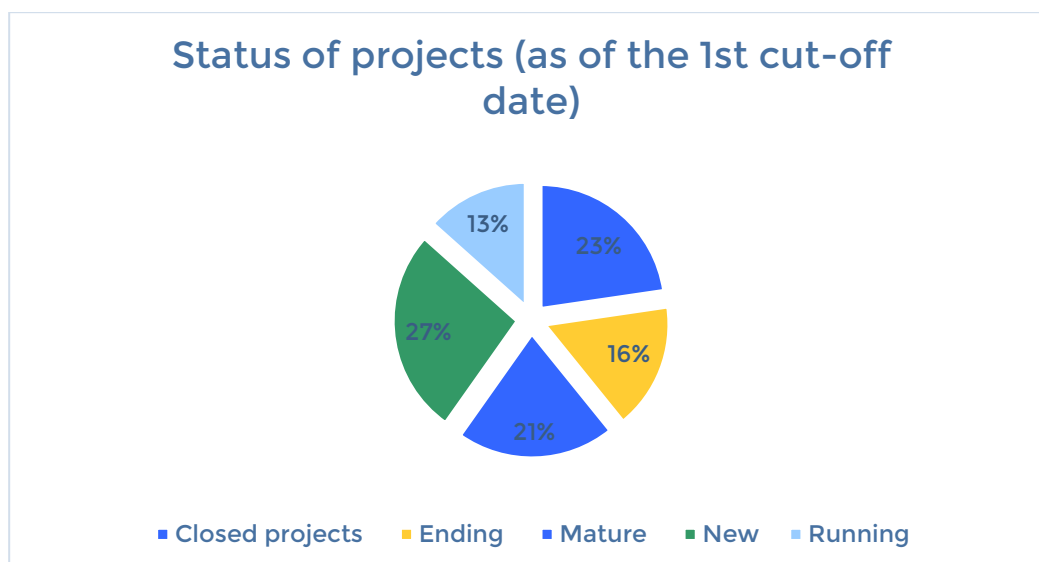

The number of projects per country that were introduced to the widerAdvance Facility were mainly related to the country of origin of the project partners.

The most common projects from beneficiaries interviewed came from the Twinning schemes.

Except the new projects which represent 1/3 of the projects brought in by the beneficiaries of Widening actions, the rest of the projects were theoretically capable of having produced key exploitable results that could be submitted to the widerAdvance Facility.
